

# More Than a Connector:

## A Platform for Growth

By partnering with Riverty and leveraging the Stripe Accounting Connector, bestfewo has successfully transformed a previously manual and time-consuming finance process into a streamlined, automated operation.

## The challenge

### Making Reconciliation as Effortless as Booking a Holiday

bestfewo, the pioneer in online bookability for vacation rentals throughout Germany, makes vacation planning seamless for thousands of customers. As the business scaled, financial operations became increasingly complex – spanning multiple payment methods, countries, and reconciliation requirements. While the team managed these tasks with great diligence, the growing volume of transactions highlighted the need for a more automated and scalable solution to support continued growth and efficiency.

## The solution

### Efficiency powered by the Stripe-Riverty Accounting Connector

Since accounting isn't part of bestfewo's core business, the company was looking for a smarter way to scale. That's when Stripe introduced them to Riverty. Thanks to the ready-to-use Stripe/Riverty Accounting Connector, bestfewo found an easy-to-implement solution that automates reconciliation, chargeback handling, and A/R management – all fully integrated into their existing setup, without needing additional internal development. This meant the technical integration with Riverty could be completed in short time.

## Simplified Finance, Stronger Focus on Customers

Since March 2024, Riverty has been managing bestfewo's end-to-end accounting processes - including the reconciliation of over 10,000 invoices annually.

This includes:

- payment method reconciliation
- month-end closing
- detailed financial reporting
- dunning workflows
- Dedicated Key Account Manager to continuously explore optimization and growth opportunities

“With Stripe and Riverty, we've streamlined complex finance operations, improved transparency, and freed up resources to focus on what matters most – delivering exceptional vacation rental experiences.”
